500 pieces puzzle for children and adults.

The Canadian river landscape between red deciduous forests is home to lots of wild animals. Can you spot them when you put all 500 pieces together? This jigsaw puzzle transports you to the northern wilderness while improving your concentration and fine motor skills. Beastly good puzzle fun for the whole family!

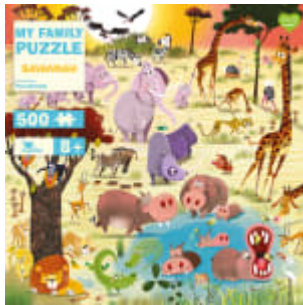

Creative People:

Illustrator: Jenny Palmer grew up in a city close to Nottingham and studied illustration and design at the University of Lincoln. She met her American spouse online through their shared love for video games. Today, they live together in Nottingham. She loves to bring bizarre scenes in her illustrations to life by using textured painting techniques and strong light effects, and to create detailed natural environments for cute animal characters to roam them.
