**The ideal gift for little paleontologists aged 3 and up.**

Which dinosaur only has two fingers? And what was the name of the dinosaur that lives in the sea? In this fun, colorful matching game, dinosaur fans big and small can discover eight of the most well-known dinosaurs and learn their names. With extra-large cards, fun and knowledge transfer can be combined and the memory trained in a playful way.

## Creative People:

**Illustrator:** Louise Forshaw was born in 1987 – probably with a pencil in hand! Her passion for drawing started when she was about 4 years old. She graduated Newcastle College with a Bachelor of Arts degree in illustration and animation in 2008. Louise lives in a small town northeast of Newcastle upon Tyne, works from home in a small studio (sometimes even from the sofa), and is duly watched by her three loud and naughty Jack Russell terriers.

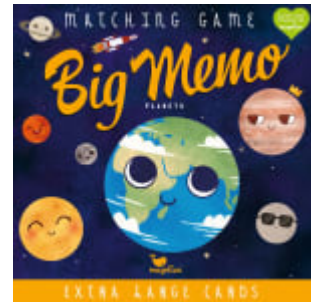

## Further Titles:

Big Memo - Forest

Big Memo - Mountains

Big Memo - Planets
