More sustainable toy street fun for your child's room!

MyRoads is the environmentally friendly play world made of wood material from responsible sources. The durable toy roads are easy to connect and are made in Germany. In addition to the MyRoads Starter Set - which includes different sized road tracks, curves and intersections - the MyRoads-Supermarket, the MyRoads-Roundabout or the MyRoads-Racing Track, there are also smaller addon sets such as MyRoads-Big Curve. This set contains eight large curves that allow a track extension of 1.70 metres (5.5 feet). Children can thus expand their MyRoads play world as they wish and build longer road tracks and add other toys - there are no limits to their imagination. Contents: 8 large curves.

Note: Natural wooden products may show signs of wear and minor colour variations.
